Collaborative AHC Process

Identified decliners / non attenders from cancer screening programmes and adds actions to enable

Identified people requiring STOMP assessment and helps develop positive attitude to change

Identified health issues to be referred on to other Health Sectors eg Dietetics, specialist dentist etc or to the Acute Sector

The prep allows for mental capacity prep by the people who support and reduces unnecessary anxiety in extended face to face time

Opens avenues for feedback and learning

Improved Flu and
Covid uptake
through
relationship
building and
identifying
barriers

Annual Health Check
Using AHC Preparation
Form and Stay health at
Home checklist

Collaborative Process

Ensures the persons
Reasonable adjustments and AIS needs are known and used

Ensuring Health and looked out for by the Patient and their support through adding stay healthy at home checklist to health check action plan

The pre call identifies those who ignore invite due to inaccurate coding

QoF

Ensuring people who do not attend are reached out to and checked up on [safeguarding]
